

Cannabis Data Science

Cananbis Data Science #50

January 25th, 2022

Research Question

Question of the Day

Are there any cultivation patterns that can be discovered from augmenting and visualizing cultivation data?

Augmenting and visualizing cannabis data

- **Box (and Swarm) Plots** - Useful for visualizing variability.
- **Bubble Plots** - Useful for visualizing a third dimension in a 2D plot.
- **Scatter Plots** - Useful for visualizing the space dimension of your data.

Thank you for coming.

Lessons of the Day

- It is imperative to have the right tools for the task at hand.
- A little data augmentation and visualization can go a long way.
