

## Cannabis Data Science #72

June 29<sup>th</sup>, 2022

*“You do not get discoveries in the sciences by taking huge amounts of data, throwing them into a computer and doing statistical analysis of them....”*

*“...that’s not the way you understand things, you have to have theoretical insights.”*

– Noam Chomsky

Machine learning suffers from three big issues:

- ① **Dependency:** domain-dependent models and training data;
- ② **Consistency:** different training leading to different results;
- ③ **Transparency:** black-box, uninterpretable algorithms that lack a reasoning process.

Thank you for coming.

Insights of the Day
