

Cannabis Data Science

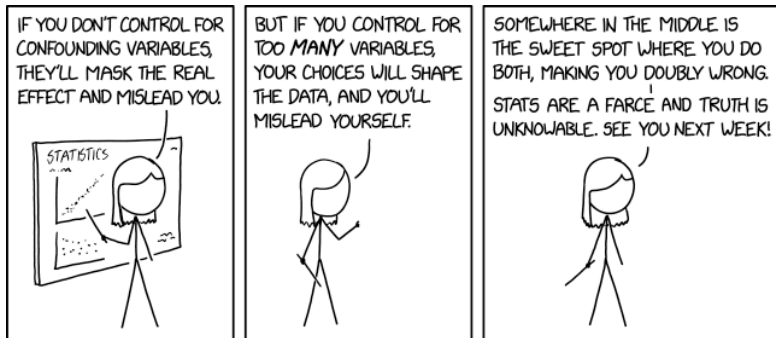

Meetup

December 29th, 2021

Principles for Data Science

- *From computer science*- The top 3 rules of programming: reuse, reuse, reuse.
- *From computer science*- Refactor, build-upon, and iterate.
- *From economics*- The choices you make matter.
- *From business* - Take stock of what you already have.
- *From data visualization* - **SHOW THE DATA.**

Saturday Morning Statistics

Source: <https://xkcd.com/2560/>

We need a model selection criterion..!

Thank you for coming.

Take some time, discuss any conclusions drawn, and try to analyze some cannabinoids and strains yourself!
