

Cannabis Data Science

Cannabis Data Science #55

March 2nd, 2022

The Trajectory of Cannabis Science

- What is the trajectory of cannabis research and science?

The general understanding of the pharmacological is sophisticated.

- The effects of terpenes are being researched.
- Bioavailability is being measured and optimized.
- Clinical trials are now in high demand.

Cultivation and manufacturing are being optimized to ever greater extents.

- Genetics are being selected and optimized for performance.
- Artificial intelligence is being implemented in creative ways.
- Further studies and optimization of yields is in demand.

Laboratory testing is stabilizing and being refined.

- Complex measurements, such as measuring metabolites, can now be performed.
- Compounds can be reliably identified down to minute scales.
- Further work can be done to connect the understanding, especially of contaminants, by labs to operators who could factor in their knowledge.

Thank you for coming.

Please share what you are interested in researching!

Lessons of the Day

- The future is bright for cannabis research and now is the time to apply your best and brightest techniques.
