Cananbis Data Science #51

February 2nd, 2022

Research Question

Question of the Day

What does the Washington State canopy look like?
How has it changed over time?

Panel Data

- A panel has the form

$$X_{it}, \quad i = 1, \dots, N, \quad t = 1, \dots, T,$$

where

- ▶ i is the individual dimension and
 - ▶ t is the time dimension.
-
- We can look at plants (x_{it}) by licensee (i) over time (t).

Thank you for coming.

Lessons of the Day

- Statistics on big data is hard, but the value from simple statistics can go a long way.
